GitHub github.com/jcapiraldev-design
Location Makati City, Philippines (UTC+8)

PROFILE

Web developer since 2012, building websites end to end, from design handoff to deployment. Since 2016 at LH Creatives, building corporate, recruitment, brand, and service websites for Japanese companies, and earlier working remotely with agencies in the Netherlands and Australia. Experienced in custom WordPress themes, PHP frameworks, and upgrading legacy PHP sites to PHP 8.x safely.

14 years
building websites

100+
live websites delivered

3 countries
Japan, the Netherlands, Australia

EXPERIENCE

2016 – Present

LH Creatives Philippines

Sr. Web Developer / Team Leader, Makati City

- Build websites for Japanese companies from start to finish: kickoff meetings, planning, turning Figma and Adobe XD designs into responsive sites, testing, and deployment.
- Develop custom WordPress themes and PHP systems, including CMS features for news, jobs, works galleries, search, and forms, using WordPress, Laravel, CodeIgniter, and the company's in-house Fegg framework.
- Lead project planning: schedules, deadlines, progress tracking, and QA testing before launch.
- Upgrade legacy sites to PHP 8.x, fixing fatal errors and deprecations and modernizing security such as password hashing.

2014 – 2015

MicroSourcing

Web Developer, Pasay City, assigned to two overseas client accounts

YP Digital, 2015
Collingwood, Victoria, Australia

The Webmen, 2014 – 2015
Apeldoorn, Netherlands

2012 – 2014

Lifedata Systems, Inc.

Jr. Web Developer, Pasig City

HOW I WORK

Kickoff and a clear plan before work starts, progress links during the build, testing on desktop, tablet, and phone before launch, and support after go-live. I reply within one business day, with working hours that overlap Japan and Australia.

CASE STUDIES

0
PHP 7.4 to 8.5 migration
Recruitment site on an older framework, upgraded with no change in behavior.

~190
PHP 8.4 and security hardening
Pages tested across two sites; logins moved to modern password hashing with no resets needed.

73 / 73
Legacy framework rescue
Template engine rewritten for PHP 8, with every compiled template proven identical.

SELECTED PROJECTS

Kariya Toyota General Hospital
Large hospital website with department pages and patient guides

Toyo Logistics
Listed company site with a full investor relations section

USJC Recruit
Recruitment site in Japanese, English, and Traditional Chinese

Top Maison
Luxury home builder site with video hero and showroom pages
